AutoSpectre 246

volume of the LFE channel

cutoff frequency
of the LFE channel

crossover frequencies for the four spectral bands :
- High sets the frontier between High and MediumHigh bands
- Mid between the MediumHigh and LowMedium bands
- Low between the MediumLow and the Low bands

outputs meters of the five main channels

frequencies in hertz

selects the frequency bands which are
routed to the five outputs

direct mix level for the left and the right inputs
on the five outputs

separate levels for each outputs
